4WD CLUB
OF SOUTH AUSTRALIA INC

Hi All,

Welcome to 2022,

Here we are already nearly February.

Not to much has changed, still wearing masks that's now part of our daily dress code.

There are plenty of awesome volunteering trips on the board but not enough general club trips.

Please have a look for any old trip notes from a trip you enjoyed and let's see if we can't make it into something.

There is so much to see in our own state so let's get back out there and enjoy some fresh air.

Hope to see you all at the next meeting.

Paul Kinnear,
President

Editors Report

Hello Everyone,

Welcome to A New Year with different rules, each day.

We are having our Sausage Sizzle before the next meeting, which is ONLY available for 45 MINUTES FROM 6.30pm. Please don't expect to be served if you arrive late, as we have to clean up prior to the meeting commencing.

Please remember that you must be a Financial Member to guarantee receiving every issue of the Bullsheet. Sign up, or miss out

During the break I had my Computer hardware and software upgraded, but still staying with W10 as I am not keen to leave the stand alone Office Product yet.

Speaking of which I have managed to sort most things out, BUT for our Head Spellchecker you may be in luck. I am having some layout issues, so be patient with the software, which isn't compliant with my way of using it !!! Overall I am happy with the upgrade. All errors and omissions may not be deliberate.

We took 4 days over last weekend out to travel to Brownhill Creek Caravan Park to become more familiar with our camper and to set it up to our liking and do some maintenance which we can't do at home. It is a wonderful setting with a great variety of birdlife to be experienced from an unpowered campsite on the creek bank.

New Trips, new ideas and new Subaru Stories in this edition

Thanks to the contributors in this edition.

Turbocharged Subaru Outback a possibility for Australia

The brand claims it is working around the clock to bring the turbocharged Outback offered overseas to Australia.

[Justin Narayan](#) 08:54, 21 January 2022

Subaru Australia says it is furiously working "closely with the factory" to introduce a **more powerful, turbocharged version of its Subaru Outback** to satiate demand.

Internationally, the [Outback](#) is offered with a 194kW/376Nm 2.4-litre turbocharged flat-four – a detuned version of the engine found in the upcoming [2022 Subaru WRX](#).

Given high-performance versions of its wagon-turned-SUV range have been discontinued since mid-2021 – when stock of the previous-generation Outback's 190kW 3.6-litre six-cylinder engine option ran out – it's understood customers are looking elsewhere for an upgrade.

Speaking to Australian media at the launch of the new [Subaru BRZ](#), boss of [Subaru Australia](#) Blair Read said "The customer demand for this model in Australia has been heard loud and clear."

"We're working closely with the factory to try and deliver this for our customers."

Despite historically offering muscular powertrains in its SUV range, Subaru's powerful-yet-aging engines have been falling victim to the global emissions rules.

In 2018, the turbocharged Subaru Forester was discontinued, despite the powertrain representing around one-in-five sales in Australia alone.

In 2021, the six-cylinder version of the Subaru Outback was also discontinued, which also represented around 15 per cent of the model mix.

Subaru has upgraded its sixth-generation Outback wagon.

The Outback drifted somewhat from its off-roading roots in the early 2000s, but the 2015 model had enhanced 4WD capability.

Up grades were introduced in 2016 and 2021.

Subaru launched its fifth generation Outback with a suite of new technology, premium soft-touch interior trim and a feature-packed infotainment system with speech recognition.

The Outback shared the Liberty's five-star rating for occupant safety from the independent Australasian New Car Assessment Program (ANCAP), with a total score of 35.99 out of a maximum possible 37.

This interesting story is too long to continue in the Bullsheet, so read the rest at the following link:-- ED

[A New Subaru Forester](#) [Technology You Want](#) [And Why It Earns A Top Award](#)

By [Denis Flierl](#) Dec 9 2021 - 12:55pm

[Home](#) / [Subaru News, Pricing and Reviews](#)

Nearly everyone can relate to backing up in a parking lot and not seeing a vehicle coming down the aisle. The 2022 Subaru Forester comes with a [new safety technology](#) called reverse automatic emergency braking that can keep a rear-end accident from occurring.

Advanced Technology Award

[J.D. Power](#) announced the 2022 Forester wins the [Emerging Automation](#) award in this year's 2021 Japan Tech Experience Index (TXI) Study. The report says Subaru ranks highest overall in the [Innovation Index](#). Mercedes-Benz ranks highest among luxury brands.

[A New Subaru Forester Technology You Want And Why It Earns A Top Award](#)

J.D. Power says the 2021 Japan TXI Study focuses explicitly on installing features on new vehicles and owner usage and problems experienced with these features, as well as their intentions to recommend and repurchase, based on 32 features that include [advanced safety technologies](#) such as active driving assistance.

The overall Innovation Index ranking is calculated based on the installation and usage of new features on new vehicles and owners' evaluations. Subaru is the highest-ranking brand this year, and additionally, Subaru ranked high in the J.D. Power 2021 Japan Automotive Performance, Execution and Layout ([APEAL](#)) Study released earlier this year.

The 2021 Japan Tech Experience Index (TXI) Study is based on responses from 19,615 purchasers of new vehicles in the first two to 13 months of ownership. The study was conducted from May through June 2021.

[A New Subaru Forester Technology You Want And Why It Earns A Top Award](#)

Subaru scored 561 points overall, followed by Mercedes-Benz (527), Lexus (500), Nissan (483), BMW (470), Mazda (452), Toyota (448), and Volkswagen (444). The industry average is 443, and Audi, Mitsubishi, Honda, Mini, Suzuki, and Daihatsu scored below the average.

The refreshed 2022 Subaru Forester's reverse automatic emergency braking technology is the feature owners like the best and earns the compact SUV the Emerging Automation award in this year's 2021 Japan Tech Experience Index (TXI) Study.

Christmas Picnic. 2021

I arrived just before 10.30 to find a large group with jumping castle, coffee van and a lot of people occupying the park where we usually set up. The car park was full, and people were parked across the road on the verge. Mmmmm, what to do? So, with a suggestion and clarification from Deb, our trip Leader, we parked on the road on the opposite side of the park.

With help, the shades went up under the dappled shade of a big old gum tree. Chairs in place, presents on the table under the felt Christmas Tree, which Olivia decorated, we sat around, and the chatter never stopped.

Deb bought her bocce set and a few games where played, you will have to ask Deb who won.

After everyone finished lunch Ella and Isabel receive their presents from

Paul, who unfortunately could not be there, then we did Kris Kringle. There was the usual selection of gifts with everyone happy with what they selected, and then the stealing began. No, not stealing, we decided it was commandeering, so a few gifts were commandeered, which always brings laughter.

It was warm, verging on hot, but under the shade of the old gum tree, and with the shades and a breeze, it was a very pleasant day.

I think I can speak for everyone who attended, it was a lovely day in the park and a good way to end the year.

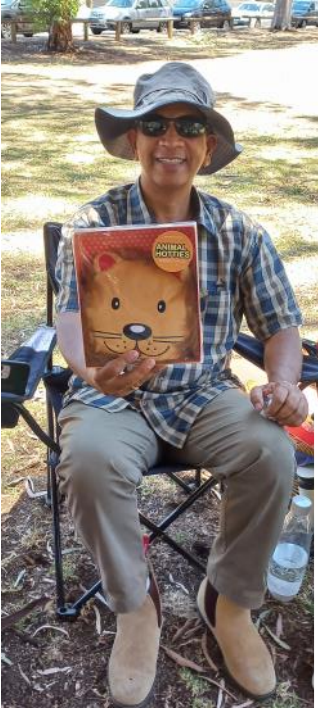

Merry Christmas to you all, and I look forward to catching up again in 2022.

Trippers - Peter & Shirley, Bruce & Gloria, Bruce McLean, Me, Ella & Izzy, Kyra, Hugh & Olivia, Mitra & Dhana and Marcia.

New LPG gas bottle fittings are coming in 2021

by Vivian Paker | Apr 4, 2021 | Caravans, Recreational

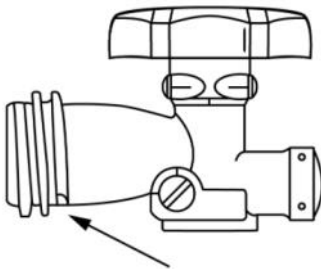

New LCC27 fittings rolling out in Australia

You may have heard that LPG cylinders will be coming out soon with a different fitting called a LCC27. Your current gas bottles most likely use a Type 21 or POL Connection.

The new LCC27 fittings have improved safety features, including an easy-to-use right hand threaded external ACME connection, and a back check valve that must be engaged by having a positive connection to the appliance hose before gas can flow. The LCC27 appliance connection also has a thermal cut-out.

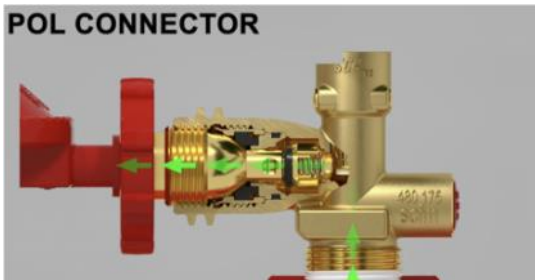

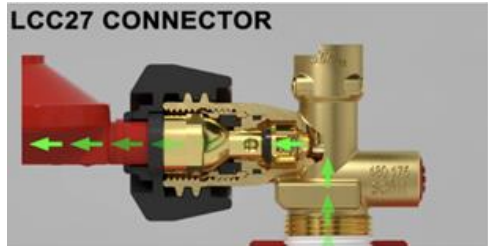

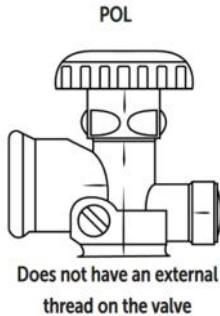

LCC27

Has a visible external thread on
the valve

New LPG gas bottle fittings are coming in 2021

Do I need an adaptor?

From April 2021 gas bottles with the new LCC27 valves will be rolled out. You will find them in exchange cages and stores in the coming months. These bottles are backwards compatible to appliances with POL connections – so you do not need an adaptor. **You will not need to change anything to use these new gas bottles with your current appliances.** Over the next 10 years the LCC27 will take over from the POL connections across the board. Leisure LPG cylinders have a 10-year test cycle, so by 2031 they should be the main bottles in use.

In the coming years new appliances will be released with a LCC27 appliance connection as standard. At that point you will need to change your gas bottles over to the LCC27 version, as these connections will need to match.

New LPG gas bottle fittings are coming in 2021

LCC27 valve + LCC27 appliance connection

LCC27 valve + POL appliance connection

POL valve + POL appliance connection

New LPG gas bottle fittings are coming in 2021

POL valve + LCC27 appliance connection

POL Connections still standard

Your current POL connection gas bottles and appliances are still safe and reliable for use, so do not worry if you cannot see a new LCC27 connection on your next cylinder swap. You will only need to make sure you have a new version bottle when you purchase an appliance with the new LCC27 appliance connection. Have a look at your appliance connection, so you can match the cylinder on your next swap!

POL appliance connection

LCC27 appliance connection

LCC27 stands for Leisure Cylinder Connection Type 27. These, and the POL connections will be used for 3.7kg and 8.5kg LPG leisure cylinders. These can be found connected to a backyard bbq, and in your caravan. Larger LPG cylinders including those typically used for domestic home connections will not be affected by the change.

For further information, and for links to the Australian Standards updated in relation to these LPG connection changes, please check out: Gasenergyaustralia.asn.au

The Subaru 4WD Club of SA is now on *Instagram*

as `subaru4wdclubofsa`

https://www.instagram.com/invites/contact/?i=b44mxpl911ip&utm_content=n3aluyd

What is Instagram?

Instagram is a free online photo and video sharing application and social network platform. Many people use it as a photo/video journal for friends and family to view. Businesses, clubs and organisations also use it to promote and share photos, video and other information.

Do I need an account?

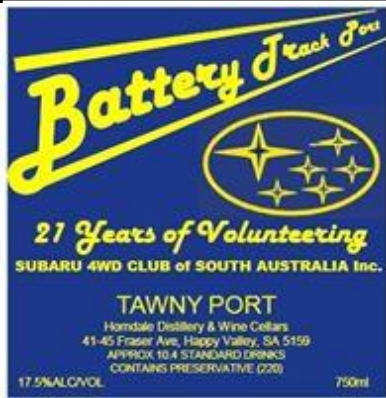

No. You can view a profile or account without downloading the Instagram app to your phone and creating an account. However, you will be unable to interact with or view the posts in detail like a regular user. If you create a personal account just for viewing the Club page, you can set it up as a private account.

How will the Club use Instagram?

Simply as a photo/video journal of our activities past, present and upcoming for members and the public to view. It will be a great way to promote our club and interact with potential new members. Interstate Subaru 4WD Clubs are already using it and have a lot of content and interaction on their pages.

We NEED your photos and short videos

Please send as many photos and video snippets as you can to the email address below so they can be uploaded, along with short blurbs explaining them. Please remember that this page is fully public, so if there are photos that you don't want made public, don't send us those.

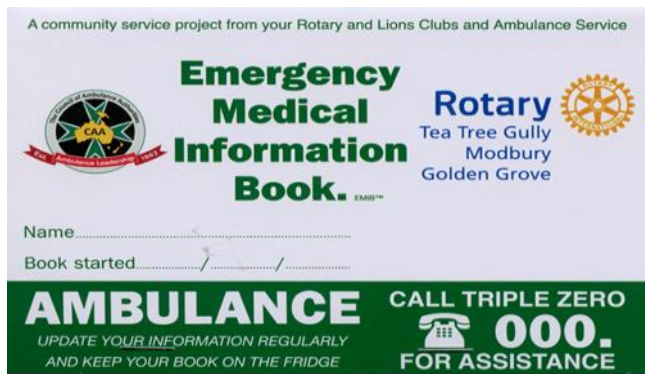

Celebrating 21 Years of Club Members Volunteering in our wonderful National and Conservation Parks.

The port will help warm up those winter nights at home, or around the

Why is it called Battery Track Port ??

This book  **saves lives!**

The Emergency Medical Information Book - contains all of your information and medical records which is needed if or when an ambulance is called and you need to be transported to a hospital.

When paramedics are called, a typical scenario is that distraught family members may be unable to give correct details of the patient's condition, or the medication they may be on. The paramedics physically have to collect all the patients medication in the house, try and obtain a medical history and take it to the hospital with the patient.

This small book contains patient contacts, service or carer provider information, medications and any medical condition, so a paramedic is able to treat and ready a patient for transport to a hospital.

THIS IS FOR YOUR OWN PROTECTION AND OURS!

Did you know that it is in the Club Constitution that your car must be maintained in good roadworthy condition with a minimum of 3rd party property insurance?

Do you have a fire extinguisher & RECOVERY KIT with you on club trips?

It's a club rule that you carry one of each.
